

GENEVIEVE EXCHANGE:
USER INSTRUCTIONS

GENEVIÈVE CRYPTO WEALTH MANAGEMENT SOLUTIONS

GENEVIEVE EXCHANGE: USER INSTRUCTIONS

Requirements:

To use the Genevieve token exchange, an Ethereum wallet web browser extension is required. We recommend using MetaMask. Jaxx is also compatible.

Wallet extensions:

- > <https://metamask.io/>
- > <https://jaxx.io/>

Deposits:

- > Select the relevant cryptocurrency pairing through the 'change pairing' link.
- > Follow the relevant deposit link listed under the respective buy and sell functional categories.
- > A pop-up window will appear; enter the amount you wish the deposit in the relevant field and click 'OK'
- > A MetaMask window will appear requesting confirmation of the transfer.
- > The funds will appear in your Genevieve account upon Blockchain confirmation.

Withdrawals:

The available balance is the withdrawable amount. Open orders lock the unfilled balance until the order is filled or cancelled; locked balances are unavailable for withdrawal

- > Select the relevant cryptocurrency pairing through the 'change pairing' link.
- > Follow the relevant withdrawal link listed under the respective buy and sell functional categories.
- > A pop-up window will appear; enter the amount you wish the withdraw in the relevant field and click 'OK'
- > A MetaMask window will appear requesting confirmation of the transfer.
- > The funds will appear in your Ethereum wallet upon Blockchain confirmation.

Buy Orders:

- > Select the relevant cryptocurrency pairing through the 'change pairing' link.
- > Under the 'Buy' functional category, enter the desired exchange rate of your order.
- > Enter the quantity you wish to purchase in the relevant field.
- > The remaining fields will auto-populate.
- > Click 'Buy'.
- > A pop-up window will request confirmation of the entered values. Click 'OK'.
- > A MetaMask pop-up window will appear to confirm the order. Click 'OK'.
- > The placed order is now visible in the 'Orders' tab.
- > Matching sell orders will execute automatically. Outstanding orders will appear on the order book. The execution allowance is 4 hours; thereafter, unmatched orders will automatically cancel.
- > Orders can be manually cancelled by clicking 'Cancel' under the orders tab.

Sell Orders:

- > Select the relevant cryptocurrency pairing through the 'change pairing' link.
- > Under the 'sell' functional category, enter the desired exchange rate of your order.
- > Enter the quantity you wish to purchase in the relevant field.
- > The remaining fields will auto-populate.
- > Click 'Sell'.
- > A pop-up window will request confirmation of the entered values. Click 'OK'.
- > A MetaMask pop-up window will appear to confirm the order. Click 'OK'.
- > The placed order is now visible in the 'Orders' tab.
- > Matching buy orders will execute automatically. Outstanding orders will appear on the order book. The execution allowance is 4 hours; thereafter, unmatched orders will automatically cancel.
- > Orders can be manually cancelled by clicking 'Cancel' under the orders tab.
